GxP Partners

GxP Partners specializes in **technology for compliance and operational excellence**. To make sure that technology drives performance, we bring you a portfolio of proven software solutions that have already passed audit in organizations with stringent process and compliance requirements. GxP Partners represents the best in **Quality, Compliance, and Business Process Management**. Then we add the elements that make your solution *your* solution. We're a value-added reseller, a systems integration expert, and a top-notch services consultant. We enjoy technology. We thrive on putting it to work for you.

GxP Partners services include:

Implementation of Systems for Quality & Compliance, Learning Management, Document Management & Imaging

- Project Management
- Software Installation
- Systems and Data Migration
- Custom Interfaces
- Applications Training

GxP Services

- GLP, GMP, Quality Systems & Supplier Audits
- Validation of Automation, Computer & Laboratory Systems
- Compliance Training

At GxP Partners, we cut through the complexities of industry standards and regulations. We then offer compliant solutions that are quickly deployed, easy to use, highly functional, and seamlessly integrated with other systems. Our solutions meet exacting standards, such as ISO, GAMP, GLPs, GMPs, QSR, 21 CFR Part 11, FDA/CBER Blood Regulations, OSHA, and HIPAA.

Customers of GxP Partners range from small businesses to Fortune 500s, with initiatives from single installations to global rollouts. Among them are leading pharmaceutical, biotechnology, and medical device companies, financial services and legal organizations, government institutions, and manufacturing-based businesses.

GxP Partners solves organizational problems and generates solutions. We waste no time or resources reinventing the wheel.

When the technology required to solve your problem has already been developed, we'll seamlessly integrate it with your existing systems. When you face challenges such as significant migration work or the need for customized interfaces, we have the talent, experience, and resources to efficiently implement your solution.

The result of this innovative approach to partnering: a portfolio of powerful applications and services that address unique business challenges, meet regulatory requirements, and provide superior performance.

Make it work.
Make it seamless.
Make it save time.
Make it compliant.
Make the deadline.

That's our job.

GxP Partners

The GxP Partners Product Portfolio

Through its network of strategic partnerships, GxP Partners offers the most innovative approaches available for managing quality, compliance, and business processes:

Centric Software: *product intelligence* solutions for distributed enterprises. Centric Software provides "out-of-the-box" connectivity to major operational and *product lifecycle management* (PLM) systems, quickly turning scattered data into measurement metrics. The Centric Decision Center dashboard offers multiple views of a product or project with live roll-up of key performance indicators (KPIs). The solutions result in direct cost reductions and revenue growth.

EtQ Reliance: the premier *enterprise quality management* software for quality, compliance, environmental, and health & safety processes. The flexible web-based solution enables you to easily manage processes and communication for: document control, corrective and preventive action, complaint handling and material returns, incident and deviation reporting, audits and surveys, change management, employee training, calibration and maintenance, and project management.

ISOtrain: a robust, web-based *learning management* solution that allows you to assign, schedule, complete, and report on employee training in compliance with a full range of ISO standards and government regulations, including 21 CFR Part 11. ISOtrain is the learning management solution for more than 30 major pharmaceutical and biotech companies. It offers a well defined business process for tracking against requirements.

Kofax Intelligent Capture & Exchange: the most reliable and widely used *production-level document and data capture* solution. The comprehensive Kofax line includes Workgroup, Enterprise, and Developer suites to automate time-consuming, error-prone manual document *scanning* processes, accelerating the flow of more reliable data throughout an organization. Ascent Capture Internet Server allows organizations to transmit documents and data scanned at branch offices to a central installation.

SAPERION: a full product suite for *enterprise content management*, offering data capturing, imaging, computer output to laser disk (COLD), digital signatures, document management, archiving, DocFlow, email, records management, and link management. Solutions include SAPERION SAP Suite to archive and manage content with SAP and SAPERION Inbound Suite to automatically process all incoming electronic and paper mail.

The GxP Partners Solutions Approach

The consultants and technicians of GxP Partners are industry veterans, technology experts, and business strategists who are ready to be part of your team. We provide start-to-finish client care, including services for software selection, systems implementation, auditing, validation, and training.

At GxP Partners, our goals are:

- to plan and deliver solutions based on our clients' requirements
- to deliver solutions of the highest quality, on time and on budget
- to maximize the productivity and cost effectiveness of our clients' solutions, ensuring the greatest ROI and competitive advantage in the market
- to foster long-term relationships with our clients

Solutions from GxP Partners support a range of business and industry applications. Our technology proposals begin with a discussion of your organizational goals and objectives. Our implementation projects conclude with an analysis of your return on investment.

GxP Partners brings the best technology available to organizations that are heavily regulated and that by necessity rely on intricate processes to meet their goals. We enjoy streamlining the complex. We know which technology to bring together into your total solution.
